# **Jotashield Carbo Silk**

### **General information**

### Product:

Jotashield Carbo Silk, Jotun Saudia Co. Ltd (Jeddah)

### Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo Phone: +47 23 08 80 00 e-mail: post@epd-norge.no

### **Declaration number:**

NEPD-2865-1563-EN

### ECO Platform reference number:

#### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR. IBU PCR Part B for coatings with organic binders

### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### **Declared unit:**

1 kg Jotashield Carbo Silk, Jotun Saudia Co. Ltd (Jeddah)

### Declared unit with option:

A1,A2,A3

**Functional unit:** 

### Verification:

Independent verification of data, other environmental information and the declaration according to ISO14025:2010, § 8.1.3 and § 8.1.4

External

Third party verifier:

Sign

and Roming

Senior Research Scientist, Anne Rønning

(Independent verifier approved by EPD Norway)

#### Owner of the declaration:

Jotun A/S Contact person: Anne Lill Gade Phone: +47 33 45 70 00 e-mail: anne.lill.gade@jotun.no

#### Manufacturer:

Jotun Saudia Co. Ltd (Jeddah)

### Place of production:

Jotun Saudia Co. Ltd (Jeddah) 8757 - Industrial Area, Unit No. 2 22426-4139 Jeddah Saudi Arabia

### Management system:

ISO 9001:2008 Certificate nr: 0044915-00, ISO 14001:2004 Certificate nr 0044914-00, ISO 45001: 2018 Certificate nr: 0098139

### **Organisation no:**

923 248 579

#### Issue date: 01.06.2021

Valid to: 01.06.2026

#### Year of study:

### Comparability:

2021

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

### Author of the Life Cycle Assessment:

The declaration is developed using EPD tool lca.tools ver EPD2020.11, developed by LCA.no AS Approval:

Collected/rec	nistered by:	Ken Gudva	anden

Internal verification by: Cleo Alves Otterbech

#### Approved:

Hakon Hauan Managing Director of EPD-Norway

### Product

### **Product description:**

Jotashield Carbo Silk is a premium quality product, specially designed for Car parks, based on a polymerized enhanced acrylic water based topcoat. This unique product with its anti-carbonation properties, not only protects the carpark walls, columns and ceilings from the vehicular exhausts that are capable of damaging the concrete, but with its high liquid water resistance and breathability, ensures that the concrete is safe from the damages that any entrapped moisture can cause.

The declared product is tested for reflectivity and easy to clean properties, it brightens up the space and performs better against stains that are likely to be present in car parks. Jotashield Carbo Silk is available in a wide range of unique colours that gives character to the car parks and is ideal for car parks walls, pillars and ceiling in car parks as a highly effective anticarbonation coating.

### **Product specification**

For information on Green Building Standard credits, see "Additional Information" on page 4.

The material composition of the declared mixed product is given below:

Materials	%
Water	50-75
Binder	10-25
Filler	10-25
Titanium dioxide	10-25
Pigment	1-3
Solvent	1-3
Additive	0.3-1
Biocide	<0.1

### LCA: Calculation rules

### Declared unit:

1 kg Jotashield Carbo Silk, Jotun Saudia Co. Ltd (Jeddah)

### Cut-off criteria:

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (less than 0.1 % dry matter) are not included. In total, more than 99% of the material input is included. These cut-off criteria do not apply for non-energy related emissions (such as wastes, hazardous materials and substances).

### Data quality:

#### Technical data:

Specific gravity: 1.27 g/cm<sup>3</sup> Solids by volume: 36 ± 2 volume%

Film thickness per coat Dry film thickness:  $35 - 50 \ \mu\text{m}$ . Wet film thickness:  $95 - 135 \ \mu\text{m}$ . Theoretical spreading rate: 7.6 - 10.8 m<sup>2</sup>/l.

The most representative and worst case formulation produced at the manufacturing site is chosen for this EPD. For products with a selection of colours, this will be the formulation with the highest content of titanium dioxide.

The product packaging is based on an average sized metal packaging, including secondary packaging such as pallets and plastic wrapping.

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.jotun.com.

For information on technical data, application and use of the product, see the Technical Data Sheet for the declared product on www.jotun.com.

### Market:

Global. Transport to market is not included in this EPD.

### Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

### Estimated service life, object

The coated object is not declared.

### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy, water and waste production in-house is primarily allocated equally among all products through mass allocation. Specific allocation was performed for certain waste flows according to information provided by the site manager. VOC emissions have been allocated entirely to the production of solvent based paints. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

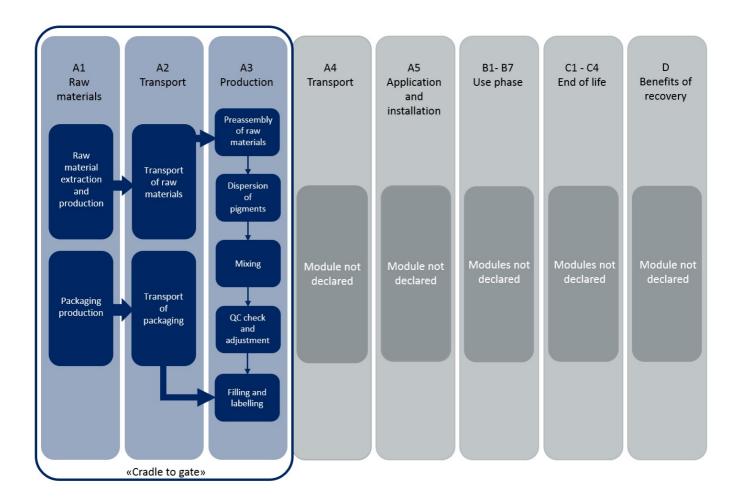

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2015. Representative data from ecoinvent v3.2 was used for other processes. The data quality for the material input in A1 is presented in tabular form.

Materials	Source	Data quality	Year
Additives	CEPE RM Database v3.0	Database	2016
Binders and Resins	CEPE RM Database v3.0	Database	2016
Others	CEPE RM Database v3.0	Database	2016
Pigments and Fillers	CEPE RM Database v3.0	Database	2016
Solvents	CEPE RM Database v3.0	Database	2016
Packaging	Østfoldforskning	Database	2017

### System boundary:

The flowchart in the figure below illustrates the system boundaries for the analysis, in accordance with the modular principle of EN 15804. The analysis is a cradle-to-gate (A1 - A3) study.

### Additional information:

The declared product contributes to Green Building Standard credits by meeting the following specific requirements:

LEED ® v4 (2013)/ LEED ® v4.1 (2020)

EQ credit: Low-emitting materials

- VOC content for Nonflat Coatings (Gloss>5 and <70 on 60 degree meter) (100 g/l) (CARB(CSM)2007) and emission between 0.5 mg/m3 and 5.0 mg/m3 (CDPH method 1.2).

MR credit: Building product disclosure and optimization

- Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path - REACH optimization: Fully inventoried chemical ingredients to 100 ppm and not containing substances on the REACH Authorization list - Annex XIV, the Restriction list - Annex XVII and the SVHC candidate list.

- Environmental Product Declarations. Product-specific Type III EPD (ISO 14025;21930, EN 15804) for Jotun Saudia Co. Ltd (Jeddah).

**BREEAM International (2016)** 

Hea 02: VOC emission (CDPH method 1.2 (2017)) and the VOC content for One-pack performance coatings (100 g/l). Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804) for Jotun Saudia Co. Ltd (Jeddah).

Additional certificates and approvals may be available on request.

### LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD. This is a cradle to gate (A1-A3) EPD with no declared modules after the factory gate. Transport from place of production to user (A4) has to be calculated by the user.

### **Additional requirements**

### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit
Electricity, Saudi Arabia (kWh)	ecoinvent 3.3 Alloc Rec	1113,82	g CO2-ekv/kWh

### **Dangerous substances**

The product contains no substances given by the REACH Candidate list.

#### Indoor environment

The declared product is emission tested by RISE Research Institutes of Sweden/SP Technical Research Institute of Sweden or Eurofins in accordance with California Department of Public Health (CDPH) Standard Method v1.2–2017.
