Product

Product description:

Majestic Sense is a premium interior paint that delivers beautiful and healthy homes. It's specially formulated with Clean Air technology to purify and enhance indoor air quality, so you can breathe easy in odourless comfort. The declared product also comes with ultra smooth finish and the ability to cover hairline cracks perfectly, giving your walls long lasting luxurious finish. Rest assured, your home will have a beautiful look and be a safe place to live in.

Features and benefits

- Clean Air Technology Majestic Sense is formulated with Clean Air
 Technology to eliminate formaldehydes and enhance the quality of the air indoors. This ensures you have a safe and comfortable place to live in.
 Odour-less Comfort No harmful emissions and chemicals, Majestic
- Sense has very low VOC and low odour, so you can always breathe easy as you enjoy your newly painted home.
- Luxuriously Smooth With its exceptionally smooth finish, Majestic Sense makes your walls look beautiful and luxurious for the very long time.
- Covers Hairline Cracks Majestic Sense seamlessly covers hairline cracks, so your walls will always have a flawless look, ensuring lasting beauty in your home.

Product specification

For information on Green Building Standard credits, see "Additional Information" on page 4.

The material composition of the declared mixed product is given below:

Materials	%
Water	25 - 50
Binder	10 - 25
Filler	10 - 25
Titanium dioxide	10 - 25
Additive	1 - 3
Biocide	<0.1
Pigment	<0.1
Solvent	<0.1

Technical data:

Density: 1.3 g/cm³

Solids by volume: 41 ± 2 volume%

Film thickness per coat: Dry film thickness: 50 - 70 μm Wet film thickness: 122 - 170 μm

Theoretical spreading rate: 8.2 - 5.9 m²/l

The most representative and worst case formulation produced at the manufacturing site is chosen for this EPD. For products with a selection of colours, this will be the formulation with the highest content of titanium dioxide.

The product packaging is based on an average sized plastic packaging, including secondary packaging such as pallets and plastic wrapping.

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.jotun.com.

For information on technical data, application and use of the product, see the Technical Data Sheet for the declared product on www.jotun.com.

Market:

Global. Transport to market is not included in this EPD.

Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

Estimated service life, object

The coated object is not declared.

LCA: Calculation rules

Declared unit:

1 kg Majestic Sense, P.T. Jotun Indonesia

Cut-off criteria:

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (less than 0.1 % dry matter) are not included. In total, more than 99% of the material input is included. These cut-off criteria do not apply for non-energy related emissions (such as wastes, hazardous materials and substances).

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy, water and waste production in-house is primarily allocated equally among all products through mass allocation. Specific allocation was performed for certain waste flows according to information provided by the site manager. VOC emissions have been allocated entirely to the production of solvent based paints. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

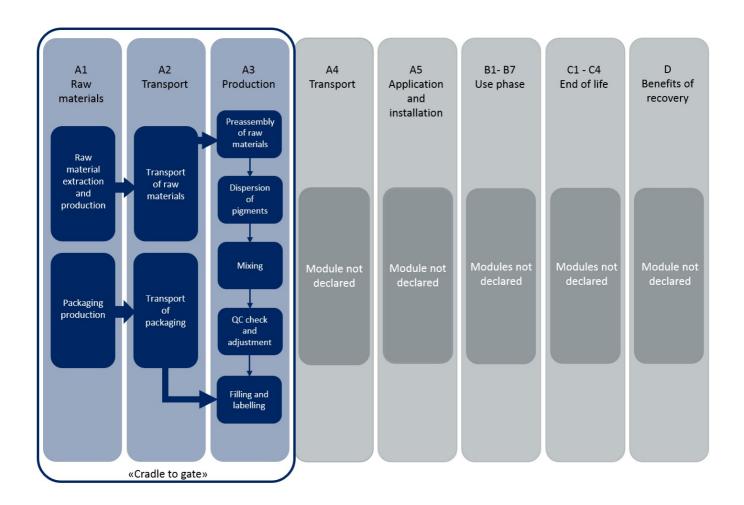

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2015. Representative data from ecoinvent v3.2 was used for other processes. The data quality for the material input in A1 is presented in tabular form.

Source	Data quality	Year

(CEPE RM Database v3.0	CEPE RM Database v3.0 Database

System boundary:

The flowchart in the figure below illustrates the system boundaries for the analysis, in accordance with the modular principle on EN 15804. The analysis is a cradle-to-gate (A1-A3) study.

Additional information:

The declared product contributes to Green Building Standard credits by meeting the following specific requirements:

LEED ® v4.1 (2020)/LEED ® v4 (2013)

EQ credit: Low-emitting materials

- VOC content for Nonflat Coatings (50 g/l) (CARB(SCM)2020) and emission 0.5 mg/m³ or less (CDPH method 1.2). MR credit: Building product disclosure and optimization
- Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path REACH optimization: Fully inventoried chemical ingredients to 100 ppm and not containing substances on the REACH Authorization list Annex XIV, the Restriction list Annex XVII and the SVHC candidate list.
- Environmental Product Declarations: Product-specific Type III EPD (ISO 14025;21930, EN 15804) for P.T. Jotun Indonesia.

BREEAM® International (2021)/BREEAM® International (2016)

- Hea 02: VOC exemplary emission (CDPH method 1.2 (2017)) and the VOC content for Interior matt walls and ceilings (Gloss < 25@60°)(10 g/l).
- Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804) for P.T. Jotun Indonesia.

Additional certificates and approvals may be available on request.

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

This is a cradle to gate (A1-A3) EPD with no declared modules after the factory gate. Transport from place of production to user (A4) has to be calculated by the user.

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit	
Electricity, Indonesia (kWh)	ecoinvent 3.3 Alloc Rec	1182,02	g CO2-ekv/kWh	

Dangerous substances

The product contains no substances given by the REACH Candidate list.

Indoor environment

The declared product is emission tested by RISE Research Institutes of Sweden/SP Technical Research Institute of Sweden or Eurofins in accordance with California Department of Public Health (CDPH) Standard Method v1.2–2017.
