

# Environmental product declaration

In accordance with 14025 and EN15804+A2

i60-600 LED 2900 HF OP

i60-600 LED 2900 HF OP

Glamox AS

Product:

**Owner of the declaration:** 

Declared unit: 1 pcs

The Norwegian EPD Foundation

This declaration is based on Product Category Rules: CEN Standard EN 15804:2012+A2:2019 serves as core PCR IBU PCR - Part B for luminaires, lamps, and components for luminaires **Program operator:** The Norwegian EPD Foundation

**Declaration number:** 

NEPD-4531-3787-EN

**Registration number:** 

NEPD-4531-3787-EN

Issue date: 02.06.2023

Valid to: 02.06.2028

**EPD Software:** LCA.no EPD generator ID: 62998

# **General information**

Product i60-600 LED 2900 HF OP

#### Program operator:

Post Box 5250 Majorstuen, 0303 Oslo, Norway The Norwegian EPD Foundation Phone: +47 23 08 80 00 web: post@epd-norge.no

Declaration number: NEPD-4531-3787-EN

#### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR IBU PCR - Part B for luminaires, lamps, and components for luminaires

#### **Statement of liability:**

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### Declared unit:

1 pcs i60-600 LED 2900 HF OP

Declared unit with option:

A1,A2,A3,A4,A5,B6,C1,C2,C3,C4,D

#### **Functional unit:**

1 pc i60-600 luminaire manufactured in Glamox Molde. Transport to costumer, installed and used according to a specific lighting regime over 20-years lifetime. Including waste treatment at end-of-life.

#### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Individual third party verification of each EPD is not required when the EPD tool is integrated into the company's environmental management system, if the procedures for use of the EPD tool are approved by EPDNorway, and iithe process is reviewed annualy. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools.

#### Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools. Approval number: NEPDT41.

Third party verifier:

#### **Owner of the declaration:**

Glamox AS Contact person: Birger Holo Phone: +47 97551574 e-mail: birger.holo@glamox.com

#### Manufacturer:

Glamox AS Birger Hatlebakks veg 15 6415 Molde, Norway

#### Place of production:

Glamox production site Molde (Norway Birger Hatlebakks veg 15 6415 Molde, Norway

#### Management system:

Factory Molde: ISO 9001, ISO 14001, ATEX, ISO 80079-34 (IECEx Factory Kirkenær: ISO 9001, ISO 14001, ISO 13485; Factory Keila: ISO 9001, ISO 14001, ISO 45001, ISO 50001.

#### Organisation no:

912007782

Issue date: 02.06.2023

Valid to: 02.06.2028

#### Year of study:

2022

## **Comparability:**

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

#### **Development and verification of EPD:**

The declaration is created using EPD tool lca.tools ver EPD2021.09, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway. NEPDT42

Developer of EPD: Marthe Øyen Gaasø

Reviewer of company-specific input data and EPD: Jonny A. Strømme

**Approved:** 

Håkon Hauan Managing Director of EPD-Norway

Vito D'Incognito - Take Care International (no signature required

## Product

#### **Product description:**

Glamox i60 is a flexible and streamlined splash proof LED luminaire for interiors and industry. The luminaire housing is made of galvanized prepainted steel with a second layer of white epoxy/polyester powder coated finish to achieve extra protection against corrosion. End caps in injection molded ASA with integrated locking device to prevent the luminaire being opened without any tools. The diffuser is made of extruded fire rated opal PC.

This environmental product declaration can be used for the following luminaires:

i60095476 - i60-600 LED 2900 HF 830 OP i60095477 - i60-600 LED 2900 HF 840 OP

## Technical data:

Please visit the product page on our website for more technical information.

#### Market:

Nordic

#### **Reference service life, product**

20 years lifetime for the installation according to the used scenario.

#### Reference service life, building or construction works

60 years. Standard service life for buildings according to PCR Part A of EPD Norway.

## **LCA: Calculation rules**

#### **Declared unit:**

1 pcs i60-600 LED 2900 HF OP

#### Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) can be excluded. These cut-off criteria do not apply for hazardous materials and substances.

#### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

#### Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Materials	Source	Data quality	Year
Coating materials	Ecoinvent 3.6	Database	2019
Electronic - Connector	ecoinvent 3.6	Database	2019
Electronic - LED plate	ecoinvent 3.6	Database	2019

# System boundaries (X=included, MND=module not declared, MNR=module not relevant)

	Product stage			Constr installati		Use stage						End of I	ife stage		Beyond the system boundaries		
Raw	materials	Transport	Manufacturing	Transport	Assembly	Use	Maintenance	Repair	Replacement	Refurbishment	Operational energy use	Operational water use	De- construction demolition	Transport	Waste processing	Disposal	Reuse-Recovery- Recycling-potential
A	.1	A2	A3	A4	A5	B1	B2	B3	B4	B5	B6	B7	C1	C2	C3	C4	D
Х	(	Х	Х	Х	Х	MND	MND	MND	MND	MND	Х	MND	Х	Х	Х	Х	Х

#### System boundary:

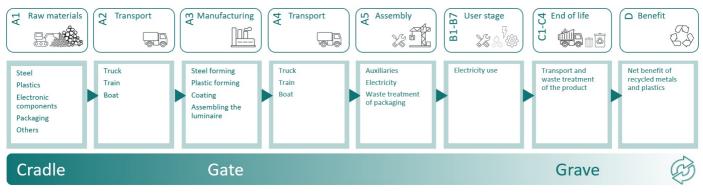

The analysis is a cradle-to-grave study of one luminaire manufactured and installed, used according to a specific lighting regime over a specific lifetime, including waste treatment at end-of-life.

A1-A5 includes the extraction and production of raw materials, transportation to the production site, the production process itself, transport to the market and assembly.

B6 is the operational energy use stage of the luminaire based on a scenario.

C1-C4 includes de-installation of the luminaire, average transport between building site and waste treatment facility, waste processing and disposal. Waste treatment of the product follows the default values provided in EN 50693.

D shows the recyclability of metals and plastics, and allows the producers a credit for the net scrap that is produced at the end of a product's life. The benefits from recycling of net scrap are described in formula from EN 15804:2012+A2:2019. Substitution of heat and electricity generated by the incineration with energy recovery of plastic insulation and other parts is also calculated in module D.

### Additional technical information:

Please visit our website www.glamox.com for more technical information.

# LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

#### Module A4:

Transport from manufacturing location in Molde to warehouse in Oslo (495 km) + average distribution into the Nordic market (500 km).

#### Module B6:

The operational energy use of the luminaire is calculated based on the methodology provided in IBU PCR Part B for luminaires, lamps, and components for luminaires. The energy consumption model for luminaire used in the PCR follows the application scenarios developed in EN 15193:2007. To calculate the electricity use of the luminaire, the following scenario parameters have been applied:

- User scenario = manufacture
- Active power of the luminaire (Pa) = 23 watt
- Passive power of the luminaire (Pp) = 0 watt
- Daylight time usage (tD) = 2500 hours
- Non-daylight time usage (tN) = 1500 hours
- Standard year time (ty) = 8760 hours
- The occupancy depency factor (FO) = 1 (factor, no unit)
- The daylight dependency factor (FD) = 1 (factor, no unit)
- The product specific constant illuminance factor (FCP) = 1 (factor, no unit)
- The non-daylight dimming factor (FN) = 1 (factor, no unit)
- The application specific empiric lifetime of the luminaire in years (a) = 20 years (corresponding to the reference service life of the product)

#### Module C2:

Average transport to Nordic waste treatment facilities (300km).

#### Modules C3 and C4:

Waste treatment of the product follows the default values provided in EN 50693, Product Category Rules for life cycle assessments of electronic and electrical products and systems, table G.4. This table specified how different types of raw materials used in A1 will likely be treated during the end-of-life of the product. Waste treatments in C3 include material recycling and incineration with and without energy recovery and fly ash extraction. Disposal in C4 consist of landfilling of different waste fractions and of ashes.

#### Module D:

The recyclability of metals, plastics, and electronic components allows the producers a credit for the net scrap that is produced at the end of a product's life. The benefits from recycling of net scrap are described in formula from EN 15804:2012+A2:2019. Substitution of heat and electricity generated by the incineration with energy recovery of plastic insulation and other parts is also calculated in module D.

Transport from production place to user (A4)	Capacity utilisation (incl. return) %	Distance (km)	Fuel/Energy Consumption	Unit	Value (Liter/tonne)
Truck, 16-32 tonnes, EURO 5 (km)	36,7 %	995	0,044	l/tkm	43,78
Assembly (A5)	Unit	Value

#### **Remarks to environmental impacts**

A luminaire is a product that consumes energy during the use phase. Combined with a relatively long expected lifetime and the environmental impact of generating electricity, the use phase (B6) will normally be the most contributing stage to the overall environmental impact of the declared unit. It is important to be aware that the actual calculations of the effect of B6 is particularly sensitive to which use scenario that is chosen and which energy grid mix that is used.

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Biogenic Carbon Content

Indicator	Unit	At the factory gate				
Biogenic carbon content in product	kg C	0,00E+00				
Biogenic carbon content in accompanying packaging	kg C	1,42E-02				

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

## **Additional Norwegian requirements**

## Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Unit
g CO2-eq/kWh

#### **Dangerous substances**

The product contains no substances on the REACH Candidate list or the Norwegian priority list at or above 100 ppm, 0,01 % by weight.

#### Indoor environment

Not relevant.

## **Additional Environmental Information**
