

# Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

TFXP 1kV 4G50mm<sup>2</sup> AFV

# Draka

# A Brand of Prysmian Group

Prysmian Group

The Norwegian EPD Foundation

Prysmian Group Norge AS

Product: TFXP 1kV 4G50mm<sup>2</sup> AFV

Owner of the declaration:

**Declared unit:** 

1 m

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR

NPCR 027:2020 Part B for Electrical cables and wires

Program operator:

The Norwegian EPD Foundation

**Declaration number:** 

NEPD-4599-3864-EN

Registration number:

NEPD-4599-3864-EN

**Issue date:** 26.06.2023

Valid to: 26.06.2028

**EPD Software:** 

LCA.no EPD generator ID: 63428

#### **General information**

#### **Product**

TFXP 1kV 4G50mm<sup>2</sup> AFV

#### **Program operator:**

Post Box 5250 Majorstuen, 0303 Oslo, Norway The Norwegian EPD Foundation Phone: +47 23 08 80 00 web: post@epd-norge.no

**Declaration number: NEPD-4599-3864-EN** 

#### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012 + A2:2019 serves as core PCR NPCR 027:2020 Part B for Electrical cables and wires

#### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### **Declared unit:**

1 m TFXP 1kV 4G50mm<sup>2</sup> AFV

#### **Declared unit with option:**

A1,A2,A3,A4,A5,B1,B2,B3,B4,B5,B6,B7,C1,C2,C3,C4,D

#### **Functional unit:**

1 m of installed TFXP 1kV 4G50mm $^2$  AFV, used to transmit a reference energy throughput of 1A (70% use rate over a period of 30 years.

#### **General information on verification of EPD from EPD tools:**

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i integrated into the company's environmental management system, ii the procedures for use of the EPD tool are approved by EPD-Norway, and iii the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

# **Verification of EPD tool:**

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools. Approval number: NEPDT32.

Third party verifier:

#### Owner of the declaration:

Prysmian Group Norge AS Contact person: Anders Nymark Phone: +47 90066733 e-mail: anders.nymark@prysmiangroup.com

#### Manufacturer:

Prysmian Group Norge AS Kjerraten 16 3013 Drammen, Norway

#### Place of production:

Prysmian Group production site Keila (Baltics Paldiski maantee 31 76606 Keila, Estonia

#### Management system:

ISO 9001, ISO 14001, ISO 45001

#### Organisation no:

814 780 422

Issue date: 26.06.2023

Valid to: 26.06.2028

## Year of study:

2022

# **Comparability:**

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

#### **Development and verification of EPD:**

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway. Approval number: NEPDT33

Developer of EPD: Siri Andersen

Reviewer of company-specific input data and EPD: Anders Nymark

# Approved:

Håkon Hauan Managing Director of EPD-Norway

Vito D'Incognito - Take Care International (no signature required

## **Product**

#### **Product description:**

TFXP 1KV AL

Double insulated cable which is allowed to be laid without extra protection, and as an intake cable for the first distribution cabinet in the building. UV resistant conducts insulation. The product is not allowed for general use in building installations.

Cenelec: N1XEV-AS (-AR)

Building Installations; Residential Installations; Industrial Installations; Road Infrastructure

#### **Product specification**

Conductor material Aluminum
Conductor surface Bare
Core insulation material XLPE
Core identification (acc. HD 308 S2) Yes
Material inner sheath Polyethylene (PE)
Material outer sheath Polyvinyl chloride (PVC)
Protective barrier Polyvinyl chloride (PVC)
Cable shape Round

Materials	kg	%
Metal - Aluminium	0,49	55,64
Plastic - Polyethylene	0,10	11,71
Plastic - Polyvinyl chloride (PVC)	0,28	32,10
Tape - Polyester	0,00	0,55
Total	0,88	

#### Technical data:

TFXP 1kV 4G50mm<sup>2</sup> AFV SAP code: 20074982 El nr.: 1017190

STANDARDS APPLIED: HD 603-5M Construction

EN 50575:2014 + A1:2016 CPR standard - Fire properties

#### Market:

Norway.

# Reference service life, product

30 years.

# Reference service life, building or construction works

30 years.

#### LCA: Calculation rules

#### Declared unit:

1 m TFXP 1kV 4G50mm<sup>2</sup> AFV

#### **Cut-off criteria:**

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

#### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

# Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Materials	Source	Data quality	Year
Metal - Aluminium	ecoinvent 3.6	Database	2019
Plastic - Polyethylene	ecoinvent 3.6	Database	2019
Plastic - Polyvinyl chloride (PVC)	ecoinvent 3.6	Database	2019
Tape - Polyester	ecoinvent 3.6	Database	2019

#### System boundary:

The flowchart below illustrates the system boundaries of the analysis:

Cradle Gate Grave

#### Additional technical information:

Test voltage [kV] 3.5

Flame retardant In accordance with EN/IEC 60332-1-2

Reaction-to-fire class (acc. EN 13501-6) Eca Max. conductor temperature [°C] 90

Min. outer temperature, fixed installation [°C] -40

Max. outer temperature, fixed installation [°C] 50

UV resistant Yes Outdoor installation Yes Min. outer temperature during installation [ $^{\circ}$ C] -10

Max. outer temperature during installation [°C] 50

Underground installation Yes

Suitable as installation cable Yes

Bending radius (rule) 12 x OD (cable overall diameter) during installation

8 x OD (cable overall diameter) fixed installed

#### LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Module A4 = A distance of 950km between the factory in Estonia and the Norwegian warehouse is considered. In addition, an extra transport to the Norwegian market averaging 300km is included.

Modules A5 = 2% product losses during installation are estimated by the company. No energy use for installation has been quantified since this operation is assumed to be done with other products and should be assessed at a construction works level. Cable drums are reused and assumed under the cut-off criterion of 1%.

Modules B1, B2, B3, B4, B5, and B7 = Company data shows that no significant activities have been reported for use, maintenance, repair, replacement, refurbishment, and water use. This reflects an absence of impacts during the 30 years reference service life of the cable in these modules.

Module B6 = The operational energy use of the cable is calculated based on the methodology described in PEP Ecopassport, Product Specific Rules (PSR) for wires, cables and accessories, reference PSR-0001-ed3-EN-2015 10 16. The following parameters are used to calculate the electricity loss of the cable:

- Estimate service life = 30 years
- Number of conductors = 4 units
- Use rate = 70 percent (according to appendix 1 of the PSR)
- Linear conductor resistivity = 0,000641 Ohm per meter
- Current intensity = 1 Ampere

Module C1 = For both buildings and construction works, cables will be taken out as part of a larger demolition. The energy use for cable removal compared to other heavier materials is assumed to be low. This module can therefore be included with zero impact.

Module C2 = An average distance between the market and the waste treatment facility is considered.

Modules C3 and C4 = Waste treatment of the product follows the default values provided in EN 50693, Product Category Rules for life cycle assessments of electronic and electrical products and systems, table G.4. This table specified how different types of raw materials used in A1 will likely be treated during the end-of-life of the product. Waste treatments in C3 include material recycling and incineration with and without energy recovery and fly ash extraction. Disposal in C4 consist of landfilling of different waste fractions and of ashes.

Module D = The recyclability of metals and plastics allows the producers a credit for the net scrap that is produced at the end of a product's life. The benefits from recycling of net scrap are described in formula from EN 15804:2012+A2:2019. Substitution of heat and electricity generated by the incineration with energy recovery of plastic insulation and other parts is also calculated in module D.

the incineration with energy recovery of plas		- particular and a second			
Transport from production place to user (A4)	Capacity utilisation (incl. return) %	Distance (km)	Fuel/Energy Consumption	Unit	Value (Liter/tonne)
Truck, over 32 tonnes, EURO 5 (km)	53,3 %	1250	0,023	l/tkm	28,75
Assembly (A5)	Unit	Value			
Product loss during installation (percentage of cable)	Units/DU	0,02			
Operational energy (B6)	Unit	Value			
Electricity, Norway (kWh)	kWh/DU	0,47			
Transport to waste processing (C2)	Capacity utilisation (incl. return) %	Distance (km)	Fuel/Energy Consumption	Unit	Value (Liter/tonne)
Truck, 16-32 tonnes, EURO 5 (km)	36,7 %	300	0,044	l/tkm	13,20
Waste processing (C3)	Unit	Value			
Aluminium to recycling (kg)	kg	0,34			
Waste treatment of plastic mixture, incineration with energy recovery and fly ash extraction (kg)	kg	0,14			
Waste treatment of polyethylene (PE), incineration with energy recovery and fly ash extraction (kg)	kg	0,05			
Disposal (C4)	Unit	Value			
Landfilling of aluminium (kg)	kg	0,15			
Landfilling of ashes from incineration of Plastic mixture, process per kg ashes and residues (kg)	kg	0,01			
Landfilling of ashes from incineration of Polyethylene (PE), process per kg ashes and residues (kg)	kg	0,00			
Landfilling of plastic mixture (kg)	kg	0,19			

Benefits and loads beyond the system boundaries (D)	Unit	Value		
Substitution of electricity, in Norway (MJ)	MJ	0,32		
Substitution of primary aluminium with net scrap (kg)	kg	0,27		
Substitution of thermal energy, district heating, in Norway (MJ)	MJ	4,84		

#### **LCA: Results**

The LCA results are presented below for the declared unit defined on page 2 of the EPD document.

<sup>\*</sup>INA Indicator Not Assessed

<sup>1.</sup> The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

<sup>2.</sup> This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

"Reading example: 9,0 E-03 = 9,0\*10-3 = 0,009" \*INA Indicator Not Assessed

Biogenic Carbon Content								
Indicator	Unit	At the factory gate						
Biogenic carbon content in product	kg C	0,00E+00						
Biogenic carbon content in accompanying packaging	kg C	0,00E+00						

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

# **Additional requirements**

# Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit
Electricity, Estonia (kWh)	ecoinvent 3.6	926,93	g CO2-eg/kWh

#### **Dangerous substances**

The product contains no substances given by the REACH Candidate list or the Norwegian priority list.

#### **Indoor environment**

Not relevant.

# **Additional Environmental Information**

Additional environmental impact indicators required in NPCR Part A for construction products											
Indicator Unit		A1	A2	A3	A4	A5	B1	B2	В3		
GWPIOBC	kg CO <sub>2</sub>	-eq	1,17E+01	2,16E-01	3,40E-01	9,99E-02	2,57E-01	0	0	0	
Indicator	Unit	B4	B5	В6	В7	C1	C2	C3	C4	D	
GWPIOBC	kg CO <sub>2</sub> -eq	0	0	1,15E-02	0	0	4,40E-02	4,94E-01	3,06E-03	-2,37E+00	

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
