## Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### Declared unit:

1 pcs Addi Stackable chair w/ armrests

#### Declared unit (cradle to gate) with option:

A1-A3,A4,A5,B2,B3,B4,C1,C2,C3,C4,D

#### **Functional unit:**

Production of one chair provided and maintained for a period of 15 years.

#### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i integrated into the company's environmental management system, ii the procedures for use of the EPD tool are approved by EPD-Norway, and iii the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

#### **Verification of EPD tool:**

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Elisabet Amat, GREENIZE projects

#### Manufacturer:

Helland Møbler AS Postboks 10 6259 Stordal, Norway

#### Place of production:

Helland Baltic ÖU Hapvali, Nõmme küla, Haapsalu linn EE-90439 Läänemaa, Estonia

#### Management system:

ISO 14001:2015, sertifikat nr 901085

## Organisation no:

943 511 128

**Issue date:** 13.12.2023

Valid to: 13.12.2028

# Year of study:

2022

# **Comparability:**

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

# **Development and verification of EPD:**

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Oddrun Aunet Innselset

Reviewer of company-specific input data and EPD: Pawel Sosinski

Approved:

Håkon Hauan, CEO EPD-Norge

#### **Declared unit:**

1 pcs Addi Stackable chair w/ armrests

#### **Cut-off criteria:**

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

# Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

#### Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

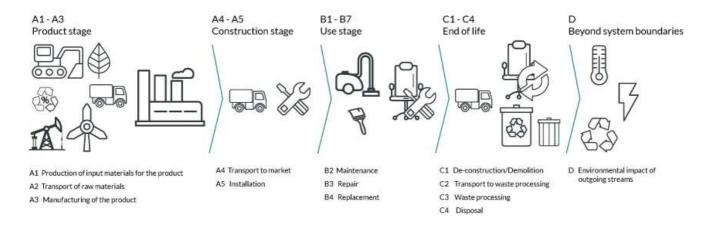

| Materials                    | Source                 | Data quality | Year |
|------------------------------|------------------------|--------------|------|
| Metal - Steel                | ecoinvent 3.6          | Database     | 2019 |
| Packaging - Cardboard        | ecoinvent 3.6          | Database     | 2019 |

#### Additional technical information:

The Helland group is Norway's leading supplier of health and care furniture. Our unique combination of design, production and sustainability has set the quality standard for healthcare furniture for over 50 years. Helland has extensive cooperation with health institutions and furniture designers in Scandinavia. Since its establishment in 1947, the company has had head office in Stordal in Sunnmøre, and established its own production in Estonia 2015. Helland products are sold in Norway, Sweden and Germany. The Helland group is organized into two sales companies, Helland Møbler AS (Sales Norway, Sweden, Denmark) and Helland Möbel GmbH (Euro zone customers). The Helland group has a total of 70 employees.

Helland Møbler AS is certified according to EU regulations. We use the CO2 equivalent for hydropower.

Helland Møbler AS is certified according to the ISO-14001 standard.

Helland has launched several models with the Swan label, and these products are treated with a special water-based varnish. This varnish has a high durability, but we advise against the use of disinfectants as this can shorten the life of the product. In addition, the Nordic Ecolabel will also require that furniture textiles are used that either have the EU Ecolabel or the Nordic Ecolabel.

All our products are produced with FSC approved wood. FSC is a global non-profit labeling scheme for wood and paper. In an FSC forest, no more trees are felled than the forest can reproduce. At the same time, the FSC label is a guarantee that animals and plant life are protected, and that the people who work in the forest are guaranteed education, safety equipment and regular pay conditions.

Helland Møbler has a modern production facility where a clean working environment is a high priority. Emissions from production that affect the external and internal environment have been reduced to a minimum. The most commonly used types of wood are birch and oak, laminated and solid wood. Chipboard, plywood and solid wood are used for interior woodwork. All sheet material, as well as glue and varnish, satisfy the E-1 norm for formaldehyde release. Foam plastic is produced without the use of CFC gas. Environmentally friendly water-based contact adhesive is used for gluing foam. All wood cladding is used for heating own premises. The cartons used are produced from recycled raw material. Cardboard, paper, plastic, steel, electrical waste and special waste are sorted and sent for recycling. Other waste is delivered to municipal landfill.

# LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

| Transport from production place to user (A4)  | Capacity utilisation<br>(incl. return) % | Distance (km) | Fuel/Energy Consumption | Unit  | Value<br>(Liter/tonne) |
|---|--|---------------|-------------------------|-------|------------------------|
| Truck, 7.5-16 tonnes, HVO, EURO 6 (kgkm)  | 35,4 %                                   | 300           | 0,056                   | l/tkm | 16,80                  |
| Truck, over 32 tonnes, EURO 6 (km)  | 53,3 %                                   | 1000          | 0,023                   | l/tkm | 23,00                  |
| Assembly (A5)   | Unit                                     | Value         |                         |       |                        |
| Waste, packaging, corrugated board box, to average treatment (kg)   | kg                                       | 2,58          |                         |       |                        |
| Waste, packaging, plastic film (LDPE), to average treatment - A5 (kg)   | kg                                       | 0,09          |                         |       |                        |

PM = Particulate Matter emissions; IRP = Ionizing radiation – human health; ETP-fw = Eco toxicity – freshwater; HTP-c = Human toxicity – cancer effects; HTP-nc = Human toxicity – non cancer effects; SQP = Soil Quality (dimensionless)

<sup>&</sup>quot;Reading example: 9,0 E-03 = 9,0\*10-3 = 0,009"

<sup>\*</sup>INA Indicator Not Assessed

<sup>1.</sup> The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

<sup>2.</sup> This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

CRU = Components for re-use; MFR = Materials for recycling; MER = Materials for energy recovery; EEE = Exported energy electrical; EET = Exported energy thermal

"Reading example: 9,0 E-03 = 9,0\*10-3 = 0,009" \*INA Indicator Not Assessed

| Biogenic Carbon Content |                     |  |  |  |  |  |  |  |
|-------------------------|---------------------|--|--|--|--|--|--|--|
| Unit                    | At the factory gate |  |  |  |  |  |  |  |
| kg C                    | 3,06E+00            |  |  |  |  |  |  |  |
| kg C                    | 1,19E+00            |  |  |  |  |  |  |  |
|                         | kg C                |  |  |  |  |  |  |  |

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

# **Additional requirements**

# Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix            | Data source   | Amount | Unit         |
|----------------------------|---------------|--------|--------------|
| Electricity, Estonia (kWh) | ecoinvent 3.6 | 926,93 | g CO2-eq/kWh |

## **Dangerous substances**

The product contains no substances given by the REACH Candidate list.

#### **Indoor environment**

Our Furniture not contain any substances that affects indoor climate.

# **Additional Environmental Information**

## **Key Environmental Indicators**

| Key environmental indicators | Unit                   | A1-A3  | A4    | A1-C4  | A1-D   |
|------------------------------|------------------------|--------|-------|--------|--------|
| GWPtotal                     | kg CO <sub>2</sub> -eq | 16,64  | 1,09  | 40,42  | 39,90  |
| Total energy consumption     | MJ                     | 789,82 | 18,80 | 942,20 | 889,85 |
| Amount of recycled materials | %                      | 8,90   |       |        |        |

| GWPIOBC  | kg CO <sub>2</sub> -eq | 0                      | 0     | 1,47E-01 | 1,64E+00 | 6,15E-03 | -5,23E-01 |

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
