

# Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

Triline Wall Panel 400x800x95

# abstracta

Owner of the declaration:

Abstracta AB

**Product:** 

Triline Wall Panel 400x800x95

**Declared unit:** 

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core

NPCR 026:2022 Part B for Furniture

Program operator:

The Norwegian EPD Foundation

**Declaration number:** 

NEPD-6088-5355-EN

Registration number:

NEPD-6088-5355-EN

Issue date: 12.02.2024

Valid to: 12.02.2029

**EPD** software:

LCAno EPD generator ID: 135726

The Norwegian EPD Foundation

### **General information**

### **Product**

Triline Wall Panel 400x800x95

### **Program operator:**

Post Box 5250 Majorstuen, 0303 Oslo, Norway The Norwegian EPD Foundation Phone: +47 23 08 80 00 web: post@epd-norge.no

### **Declaration number:**

NEPD-6088-5355-EN

### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 026:2022 Part B for Furniture

### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### Declared unit:

1 pcs Triline Wall Panel 400x800x95

#### Declared unit (cradle to gate) with option:

A1-A3,A4,A5,B2,B3,B4,C1,C2,C3,C4,D

### **Functional unit:**

The product hangs on the wall until its end-of-life, after which it can be dismantled and recycled or returned to Abstracta for reuse or recycling.

### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

### **Verification of EPD tool:**

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Elisabet Amat, GREENIZE projects

(no signature required)

#### Owner of the declaration:

Abstracta AB Contact person: Tim Wisme

Phone:

e-mail: tim.wisme@abstracta.se

#### Manufacturer:

Abstracta AB

#### Place of production:

Abstracta AB Lammengatan 2 363 45 Lammhult, Sweden

### **Management system:**

ISO 9001, 14001 och 45001

### Organisation no:

556046-3852

Issue date: 12.02.2024

Valid to: 12.02.2029

### Year of study:

2022

### Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

### **Development and verification of EPD:**

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Tim Wisme

Reviewer of company-specific input data and EPD: Erik Graesen

Approved:

Håkon Hauan, CEO EPD-Norge

### **Product**

### **Product description:**

Triline Wall Panel creates a better soundscape by both diffusing and absorbing sound waves. At the same time, the triangular prism shape of its panels interacts with light to introduce a visual dynamic and movement to the space. The sound-absorbent panels can be mounted horizontally or vertically, allowing you the freedom to construct both symmetrical and asymmetrical formations.

See the product page for more information https://abstracta.se/product/triline-wall/.

#### **Product specification**

The product is made from compressed polyester, covered in fabric. It is hung on the wall with hidden brackets. See the product brochure for more information https://lammhults.sharepoint.com/:b:/s/abs-webpage/EWKGbJsdEm1OnQE77hW4pIMBXLY89XCQiIT7IauK-WsF3A?e=HOTxbY.

Materials	kg	%	Recycled share in material (kg)	Recycled share in material (%)
Filt	0,67	40,52	0,34	50,00
Glue for wood	0,02	1,21	0,00	0,00
Metal - Stainless steel	0,10	6,28	0,02	21,83
Textile - Wool	0,21	12,74	0,00	0,00
Wood - Medium Density Fibreboard (MDF)	0,65	39,25	0,00	0,00
Total	1,66		0,36

### Reference service life, building

60 years

### LCA: Calculation rules

#### **Declared unit:**

1 pcs Triline Wall Panel 400x800x95

### **Cut-off criteria:**

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

#### Allocation

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

### Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

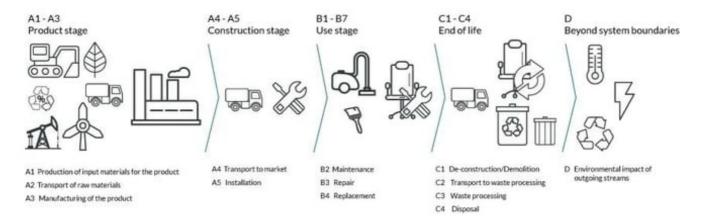

Materials	Source	Data quality	Year
Filt	S-P-04908	EPD	2020
Glue for wood	ecoinvent 3.6	Database	2019
Metal - Stainless steel	ecoinvent 3.6	Database	2019
Packaging - Cardboard	Modified ecoinvent 3.6	Database	2019
Packaging - Plastic	ecoinvent 3.6	Database	2019
Recycled cardboard	Modified ecoinvent 3.6	Database	2019
Textile - Wool	Modified ecoinvent 3.6	Database	2019
Wood - Medium Density Fibreboard (MDF)	ecoinvent 3.6	Database	2019

### System boundaries (X=included, MND=module not declared, MNR=module not relevant)

Р	roduct stag	ge		uction ion stage				Use stage				End of life stage			Beyond the system boundaries	
Raw materials	Transport	Manufacturing	Transport	Assembly	Use	Maintenance	Repair	Replacement	Refurbishment	Operational energy use	Operational water use	De- construction demolition	Transport	Waste processing	Disposal	Reuse-Recovery- Recycling-potential
A1	A2	A3	A4	A5	B1	B2	В3	B4	B5	В6	В7	C1	C2	C3	C4	D
Χ	Χ	Χ	Χ	Χ	MNR	Χ	Χ	Χ	MNR	MNR	MNR	Χ	Χ	Χ	Χ	X

#### System boundary:

The analysis is a cradle-to-cradle, A1-D, where some B-stages that were assumed to be neglectable are not included. The A1-A4 stages includes the extraction and production of raw materials, transportation to the production site, the production process itself, and an estimated transport distance to the market. A5 includes the generated waste from the packaging of the product after the assembly at the customer. The only B-stage that is assumed to be relevant is B2, which includes assumptions on how the customer takes care of the product according to Abstracta's care instructions. The C- and D-stages includes the use of materials and energy for deconstruction, the transport to waste management, the waste processes, disposal of materials that cannot be processed, and the potential of reuse, recovery, and recycling of the product.

### Additional technical information:

To preserve the fabric colour and the appearance of the fabric, Triline should be vacuumed regularly with a soft nozzle.

Polyester Stain Removal: Use uncoloured paper towel or cloth to soak up as much as possible of the stain. Dried stains should be vacuumed. Moisten the stain lightly with a clean white cotton cloth, lukewarm water and possibly a small amount of pH-neutral detergent. Press a dry cloth or uncoloured paper towel against the fabric so that moisture and dirt are absorbed. Repeat moistening and soaking until the stain is gone. Use clean water without detergent at the last moistening. Finish with soaking.

Wool Stain Removal: Dab or wipe gently with a moist cloth.

Abstracta offers a reuse service for our clients. This involves us collecting worn-out products to facilitate reuse, renovation, or recycling. In order to make circularity easier, most of our products feature replaceable parts, simplifying repair. We do this in the hope that we can help contribute in the transition to a more sustainable future. Read more about the service here: https://abstracta.se/story/abstracta-is-introducing-a-new-recycling-service-for-used-products-abstracta/ or contact our Sales Support for more information. Otherwise, try to ensure that the product can be reused when possible, or else, dismantle it so that as much of the materials can be recycled as possible.

### LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Some assumptions have been made regarding the products lifetime after leaving the factory gates. The product is assumed to be transported to a customer in Scandinavia, the UK, or France (85% of sales in 2022). An average distance to the customer has been calculated through this data. In the A5 phase, the packaging of the product becomes waste, and the impacts are added automatically according to assumptions made in the EPD tool on waste handling on-site. In the use stage, the assumption is that the customer takes care of the product by vacuuming it on a yearly basis. For the end-of-life stage of the product, it has been assumed that there is a 50 km distance from the customer to a waste terminal. The rest of the values are automatically filled in by the tool. For the D-stage, automatic values are filled in, according to generic data.

roi the D-stage, auto	matic values are illieu	in, according to generic data.

<sup>\*</sup>INA Indicator Not Assessed

<sup>1.</sup> The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

<sup>2.</sup> This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Biogenic Carbon Content								
Unit	At the factory gate							
kg C	3,01E-01							
kg C	1,37E-01							
	kg C							

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

### **Additional requirements**

### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit
Electricity, Sweden (kWh)	ecoinvent 3.6	54,94	g CO2-eq/kWh

### **Dangerous substances**

The product contains no substances given by the REACH Candidate list.

#### **Indoor environment**

A test report for the indoor emissions is available here: https://lammhults.sharepoint.com/:b:/s/abs-webpage/EeZxREEya8hHivZUxv-HsFgBAua3QmSzVHl8GD\_nyFoONw?e=hXdhpK

### **Additional Environmental Information**

### **Key Environmental Indicators**

Key environmental indicators	Unit	A1-A3	A4	A1-C4	A1-D
GWPtotal	kg CO <sub>2</sub> -eq	13,48	0,16	16,88	16,73
Total energy consumption	MJ	119,50	2,49	123,17	110,17
Amount of recycled materials	%	21,84			

Additional environmental impact indicators required in NPCR Part A for construction products								
Indicator	Unit		A1-A3	A4	A5	B2	В3	
GWPIOBC	kg CO <sub>2</sub> -eq		1,44E+01	1,62E-01	8,28E-03	9,87E-03	0	
Indicator	Unit	B4	C1	C2	C3	C4	D	
GWPIOBC	kg CO <sub>2</sub> -eq	0	0	1,57E-02	1,78E+00	4,25E-03	-1,66E-01	

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
